Technical Skills

Languages: Java, TypeScript, JavaScript, SQL, Python

Frontend: React.js, Next.js, Redux, Tailwind CSS, Material UI

Backend: Node.js, Express, REST, gRPC, GraphQL, Kafka, AWS(S3, SQS, DynamoDB), Redis, MongoDB, MySQL

Testing & Tools: React Testing Library, Playwright, Git

Experience

System Engineer

June 2025 – Present

Infosys

Pune

- Contributed to the development of an **internal developer portal** built on Backstage, owning features across frontend, backend, custom plugins, integrations, and developer workflows.
- Developed custom **Backstage** catalog processors and scheduled ingestion workflows to synchronize application metadata from legacy systems into the internal software catalog, with hourly incremental updates and periodic full refreshes.
- Built Backstage Software Templates to standardize and streamline service onboarding and provisioning workflows for developers.
- Developed custom Backstage plugins to provide application-specific links and integrate engineering tools including **GitLab**, **Jira**, **FOSSA**, **Black Duck**, and **SonarQube** into a unified developer portal.
- Implemented **role-based access control** for internal developer portal features, managing permissions across plugins and integrations.

Freelance

March 2024 – April 2025

Consultant Developer

Remote

- Built a **car dealership management platform** using Next.js, Node.js, and PostgreSQL, including inventory management, vehicle listing workflows and admin dashboards for dealership operations.
- Developed **ecommerce frontend modules** with React and Redux, implementing cart flows, product filtering and checkout state management.
- Developed **SaaS admin panels** using React, Firebase, and Redux with authentication, role-based access control, multi-step forms, and reusable dashboard components.

Projects

My Cloud | *React, Node.js, tensorflow, SQS, S3*

[Github](#)

- Designed and implemented end-to-end file storage using **AWS S3** with **signed URLs** and **JWT authentication** for secure uploads/downloads.
- Architected** an **asynchronous AI pipeline (SQS + background workers)** using **TensorFlow.js** to auto-classify files into smart folders and also assign different tags.
- Integrated MongoDB** for metadata storage and retrieval, supporting file categorization and user-based access patterns.

RFP-AI | *React, TypeScript, Node.js, Express.js, Prisma, PostgreSQL, Groq, Ollama, IMAP, SMTP, REST APIs*

[Github](#)

- Built an end-to-end AI-powered RFP automation platform using React, TypeScript, Node.js, Express, and Prisma, converting unstructured requirements into **structured RFP workflows**.
- Implemented intelligent **email automation** with **IMAP polling and SMTP**, enabling automatic ingestion, parsing, lifecycle tracking, and audit logging of vendor proposals.
- Developed an LLM-driven proposal evaluation pipeline using **Groq with Ollama fallback**, generating structured comparisons and scores to support faster, data-driven procurement decisions.

Education

C V Ramam Global University, Bhubaneswar, India

2021 – 2025

Bachelor of Technology in Computer Science and Engineering

8.50

Accomplishments

- Solved **400+** dsa questions on leetcode [link](#)
- Published **IEEE** journal on **Decentralized storage** using **blockchain** with **Role-Based Access Control**. [link](#)
- Smart India Hackathon'23 Finalist** [link](#)
